# About TradingScout

We founded **TradingScout** because we love **Footstock** and we want to be part of the journey as it grows. Footstock has had huge growth over the last 12 months and we saw a gap in the market for trusted tools that will enable you to get the most out of your Footstock experience. We want to fill that gap. Our initial launch in July 2020 provides you with a **free online tool** that provides a single point of access to tools that help with **Multi-Player Roulettes, Virtual Tournaments and Virtual Battles**. But we have bigger plans and more tools are in the pipeline that will support you with all aspects of Footstock – from trading cards to picking teams for real life football matches.

Our commitment is that we will continue to evolve the tools as **Footstock** evolves and grows. With your feedback and support we hope that we can grow the product, grow the market and provide **simple, easy to use** tools that can be used and accessed on **desktop and mobile** – by beginners or pro's.

## What is Footstock?

Where Player Trading meets Fantasy Football.

Footstock combines daily fantasy football with the ability to buy and sell players on the Footstock Market, all alongside Footstock games that can be played **24/7**.

If you haven't tried Footstock then you can **JOIN HERE** and will receive a **Joining Pack of £10 in tournament coupons and 50 bonus players**. No deposit required.

**FANTASY FOOTBALL TRADING HAS ARRIVED.**

**JOIN THOUSANDS ON FOOTSTOCK AND GET A FREE, NO-STRINGS WELCOME PACK TODAY.**

# Virtual Match Assistant

Our Virtual Match Assistant will help you see the player statistics for the starting lineups of those teams in Footstock Virtual Tournaments and Virtual Battles. We've created a simple 3 step process that enables you to select the 11 Home and 11 Away team players from the published line-ups on either desktop or mobile.

The statistics are updated daily following any real life games from the previous day. Once you have selected the players you will be presented with the **team statistics** such as **PPG (Points Per Game)**, **Average Goals Scored and Conceded Per Game** based on the last **19 games statistics** for each of the players.

For each of the players you will then see the percentages for **Goals and Assists** - so it that team scores the chance of each player scoring or assisting for that goal will be shown. Finally we include a **PPGB (PPG Base)** figure which is the PPG score for each player with the removal of points allocated for goal based events (e.g. goals , assists, clean sheets), yellow and red cards, wins and minutes played. This figure provides a guide to players who may score highly for PPG even if their team doesn't win, score or keep a clean sheet.

## Pick a team in minutes...

The Footstock Virtual Battles have a 5 minute reservation period to keep your slot. From our Beta Testing traders took an average of 3 minutes to pick their teams using the **Virtual Match Assistant** on both mobile and desktop.

Notes: The VMA is a guide only and does not guarantee victory. Footstock have not published how the Virtual Battles are configured but we are working directly with them to ensure that we can provide you with as accurate statistics as possible as both of our platforms develop. Our VMA tool uses data that is updated on a daily basis which may mean that some players displayed in Virtual Battle lineups who have become inactive or have changed teams are not displayed in our VMA. As the VMA is displaying the more accurate information we aren't able to accomodate this but we recommend you select an 11th player as a replacement who is likely to have low statistics such as a reserve goalkeeper.

## Multi-Player Roulette Statistics

Our multi-player roulette tool allows you to quickly and easily see the win percentages and prices of all of the currently Active players on Footstock. Because we update all the statistics daily you can use the most up to date information to inform your roulette choices for any style of roulette tournament.

We have 3 different ways to compare the statistics:

**All Players:** Suitable for tournaments of 8 players or more where any player can be chosen

**Player Category:** Suitable for 2 and 4 player tournaments where selections are limited to certain player categories

**Specific Players:** Suitable if you want to see who is best at beating a certain opponent

The price that we use is the average of the Buy Price and the Sell Price from the latest daily update. This is the same Price that is used by Footstock to value your portfolio and we felt that this was therefore the best option to use. In a small number of circumstances we may adjust a price where the difference between the Buy and Sell price is large and would obscure the data - for example where there is a new active player who has an extremely high Buy Price due to the low market activity for that player. In these circumstances we will set the Average Price at the Sell Price.

## Daily Updates!!

We update the player statistics and prices daily to ensure that you are always using information that is as up to date as possible. The win and profitability margins can be fine so we think this is key to giving you the most chance of success.

Note: The roulette statistics that we produce are to be used as a guide only and do not guarantee victory. Footstock have not yet published how the roulette games are generated and so our percentage estimates currently assume an even distribution of outfield player statistics within tournaments and exclude Goalkeepers to provide what we believe to be a more indicative indication of the win percentages that will arise. We are working directly with Footstock to ensure that we can provide you with as accurate statistics as possible as both of our platforms develop.
